MR-PRESSO funnel plots (Wald ratio vs precision)
a
total body → Any fracture
IVW β = -0.337
MR-Egger β = -0.337
Cochran I² = 78%
Precision (1 / SE)
SNP-specific Wald ratio
b
femoral neck → Any fracture
IVW β = -0.351
MR-Egger β = -0.343
Cochran I² = 83%
Precision (1 / SE)
SNP-specific Wald ratio
c
total body → OA knee
IVW β = +0.078
MR-Egger β = +0.078
Cochran I² = 81%
Precision (1 / SE)
SNP-specific Wald ratio
d
OA (knee) → BMD total body
IVW β = +0.031
MR-Egger β = +0.036
Cochran I² = 49%
Precision (1 / SE)
SNP-specific Wald ratio
