OA_knee h² scales as 1 / N
h² = 1 (biologically impossible upper bound)
10^0
10^{-1}
h² (observed scale)
Reported
h² = 0.0354
N = 1,208,397
Deterministic rescaling of the reported estimate (h² scales as 1/N);
no new LDSC run. r_g and all MR directions are N-invariant (§5.2).
10^4
10^5
10^6
Representative N used for OA_knee
